NGUYEN HUU HOANG PHO

BUSINESS ANALYST INTERN

Phone: 0379876301 **Email:** hoangpho.2212@gmail.com **Location:** Danang, Vietnam
Portfolio: portfolio-ba-gamma.vercel.app

PROFESSIONAL SUMMARY

Analytical and technically-driven Business Analyst Intern with a solid foundation in full-stack software engineering, desktop application architecture, and automated workflows. Highly adept at translating complex functional specifications, database design requirements, and user stories into structured, actionable technical solutions. Proven experience in project coordination, rigorous validation testing, and seamlessly bridging the gap between business stakeholders and engineering teams.

EDUCATION

Bachelor of Software Engineering
University of Greenwich
Upper Second-Class Honours (2:1)
Academic Grade: **69/100**
1ptbelowFirst-Classthreshold
Expected Graduation: **2027**

CORE COMPETENCIES & SKILLS

BA & Agile Methodologies: Requirements Gathering (SRS), Use Case & Class Modeling, Workflow Design, Jira Sprint Planning, Agile/Scrum.

Data & System Integration: Database Schema Design (MongoDB, MySQL), ETL Workflows, Microsoft Power Automate, API Gateway Configuration (Ocelot).

Testing & QA: Input Validation Matrices, Test Case Design, System Diagnostics, xUnit, Manual Testing.

Languages & Communication: English (B2 Level), Vietnamese (Native).

KEY TECHNICAL PROJECTS & BUSINESS ANALYSIS

AptisGo Exam Preparation Platform

MongoDB | Jira | UML

- **BA Focus & Requirements:** Produced comprehensive system documentation including Business Requirements Document (BRD), Software Requirements Specification (SRS), System Architecture Document (SAD), and User Stories. Designed system architecture utilizing Class/ERD diagrams and C4 models, and managed Agile sprint schedules via Jira.
- **System Implementation:** Engineered a robust web application for Aptis exam preparation featuring an automated grading system for the listening section. Implemented flexible NoSQL data storage solutions using MongoDB to accommodate complex, dynamic exam structures.

Desktop Information System for Education Centre

C#.NET Windows Forms | MySQL

- **BA Focus & SRS:** Authored an end-to-end Software Requirements Specification (SRS) detailing business functional requirements, data validation rules, and system non-functional quality attributes for administrative and teaching personnel.
- **Domain Modeling:** Architected object-oriented UML class diagrams and use case workflows, designing an abstract base class (Person) with derived entity hierarchies for teachers, administrators, and students.
- **Quality Assurance:** Implemented and executed a rigorous input validation matrix across multiple test cases (TC1-TC9) to guarantee data integrity for names, email formatting, and numeric salary constraints.

Microservices URL Shortener Platform

.NET Core | Vue.js | MongoDB | RabbitMQ | Ocelot

- **Agile Sprint Management:** Facilitated sprint planning and task backlog distribution using Jira within an Agile framework to successfully decouple monolithic application logic into containerized microservices.
- **Architecture & Integration:** Configured Ocelot API Gateway routing rules and established an asynchronous event-driven messaging pipeline via RabbitMQ to maintain data consistency and handle cascading deletions across distributed databases.

LEADERSHIP & ORGANIZATIONAL IMPACT

- **Strategic Leadership & Management:** As Chairman of the Greenwich Football Club (Gre FC), directed core club operations, coordinated cross-functional volunteer committees, and unified diverse student cohorts to execute competitive athletic events.
- **Stakeholder Negotiation & Tournament Logistics:** Directed the end-to-end event logistics for an 8-team competitive university championship: successfully negotiated custom structural regulations (including home-half back-pass rule allowances) directly with the leadership board.
- **Cross-Functional Communication:** Bridged operational gaps between technical, operational, and non-technical stakeholders, translating complex logistical and rule constraints into clear, structured schedules across multi-day tournament fixtures.
